

CLA/3M Canada Award for Achievement in Technical Services

The Technical Services Interest Group is pleased to announce the generous sponsorship of this award by 3M Canada.

Purpose

To recognize achievement in technical services in order to:

- encourage innovation and excellence;
- share new ideas or innovative approaches to technical services problems with other libraries so that they can incorporate them or build on them, as appropriate;
- foster high morale in technical services units; and
- raise the profile of technical services within individual libraries and across the Canadian library community.

Eligibility

Any technical services unit whose library has an institutional membership in CLA.

Guidelines

The unit which applies should have demonstrated achievement during the past year in:

- planning and implementing an ongoing program, services or special project;
- developing or utilizing new or improved methods, techniques, or routines;
- and identifying or implementing an innovative approach to solving a problem or meeting a need in any aspect of technical services, including: management, automation, security of the collection, acquisitions, serials control, cataloguing, processing of library materials, or the innovative design/layout of the Technical Services area.
